

# Gong

Tra le pagine di questa storia si raccoglie il fascino delle tradizionali lanterne cinesi. Gong si ispira alla loro forma che contiene, protegge e porta la luce. Il diffusore è un bozzolo di cristallo soffiato, inciso esternamente e decorato sia all'interno che all'esterno, lasciando che la porzione rivolta verso il basso riveli tutta la purezza del vetro. Dopo una sofisticata ricerca su verniciatura, specchiatura e metallizzazione, la lampada si accende raccontando raffinatezza, riflessioni ed evanescenze di metalli e materiali preziosi. Disponibile in tre diverse versioni (sospensione, tavolo e parete), è offerta in cinque finiture diverse e con molteplici sorgenti luminose. Disegnata da Sergio Prandina, questa collezione conserva e tramanda tutta la tradizione di Prandina.

Among the pages of history, one finds the charm of the traditional Chinese lantern. Gong is inspired by their shape, which contains, protects and projects light. The diffuser is a blown crystal cocoon, externally engraved and decorated both inside and out, while the lower part is left to reveal all the purity of glass. Having completed advanced research on painting, mirroring and metallization, the lamp lights up to demonstrate the refinement, reflections and evanescence of precious metals and materials. Available in three different versions (suspension, table and wall), it is offered in five different finishes and with multiple light sources. Designed by Sergio Prandina, this collection preserves and passes on all the Prandina tradition.

Cristallo soffiato a mano e verniciato

Hand-blown and internally painted crystal

Gong nella versione sospensione ha una diffusione della luce importante e delicata. Il cristallo è in vetro soffiato e sempre con le incisioni fatte rigorosamente a mano. La sospensione è disponibile in tre diametri (18cm, 30cm e 36cm).

Gong in the pendant version has an important and delicate light diffusion. The crystal is in blown glass and always with the engravings made strictly by hand. The suspension is available in three diameters (18cm, 30cm and 36cm).

**Gong S3 - S5**

Gong nella versione sospensione è disponibile come standard in sei finiture diverse, dal bianco verniciato alla foglia oro applicata a mano, passando per versioni metallizzate. Grazie ad una speciale finitura ottenuta attraverso un processo di specchiatura e metallizzazione, Gong è caratterizzata da un particolare effetto che si rivela a seconda che questa si presenti accesa o spenta. La lampada, disponibile nelle colorazioni argento e rame, quando spenta appare omogeneamente colorata e specchiata verso l'esterno. Nel momento in cui si procede all'accensione della lampada si ottiene un effetto a sorpresa. Le parti centrale e superiore appaiono specchiate e trattengono la luce che quindi non viene diffusa verso l'esterno, se non attraverso le due sottili incisioni che percorrono il corpo del diffusore; la parte inferiore, libera la luce verso il basso.

Crystal

Gong pendant version is available as standard in six different finishes, from white painted to gold leaf applied by hand, passing through metallic versions. Thanks to a special finish obtained through a process of mirroring and metallization, Gong is characterized by a particular effect that is revealed depending on the lamp to be shown turned on or off. When the lamp, available in the copper or silver nuance, is turned off it appears homogeneously coloured and mirrored outwards. At the time that the lamp is turned on you get a surprising result. The central and upper parts appear mirrored and they hold back the light so that it's not broken forth outwards, but for the two thin incisions that go through the body of the diffuser; the lower part, instead, reveals its transparency releasing the light downwards.

Gong nella versione da tavolo è disponibile in due diametri diversi (18 cm e 30 cm) con una diversa diffusione di luce. Nel caso della versione più piccola, nelle finiture metallizzate la luce traspare dal diffusore, mentre nel caso della versione più grande la luce si diffonde unicamente dalla parte inferiore di cristallo. In entrambe le versioni il cavo è in tessuto.

Gong in the table version is available in two different diameters (18 cm and 30 cm) with a different light diffusion. The metalized finishes in the smaller version let the light shines through the diffuser, while in the case of the larger version the light diffuses only from the lower crystal part. In both versions the cable is fabric-covered.

La versione da parete è disponibile solo con un diametro di 18 cm e con sette combinazioni diverse tra la finitura del vetro (bianco, argento, rame, nero e foglia oro) e la finitura della struttura (bianco opaco, cromato, ottone heritage). Disponibile con sorgente G9 o con LED integrato di 4W, 3000K, con 720 lm.

The wall version is available with a diameter of 18 cm and with seven different combinations between the glass finish (white, silver, copper, black and gold leaf) and the structure finish (matt white, chrome, heritage brass). Available with G9 source or with integrated LED of 4W, 3000K, with 720 lm.
